Recommended Uses: Reduction of unnecessary midfoot and forefoot motion, stiffening of shoe or insole, Morton's extension ideal for first ray isolation

CARBOFLEX®

These extremely lightweight carbon-composite foot plates are available in three thicknesses, and three shapes:

Contoured Plates

- Standard $\frac{1}{2}$ " contour
- Available in 4 sizes
- Fits Right or Left

Flat Plates

- No contour heel to toe
- Available in 6 sizes
- Fits Right or Left

Morton's Extension Plates

- Standard $\frac{3}{4}$ length
- Available in 2 sizes
- Must order Right or Left

Used to limit foot motion, Acor CarboFlex® Footplates can be used in place of steel shanks or spring steel. CarboFlex® Footplates are not heat moldable but can be trimmed with a scroll saw and sanded with 80 grit sandpaper.

These extremely lightweight carbon composite foot plates are available in three shapes and thicknesses.

Part numbers can be found on Index page 40.
