

Upper Extremity Garments

Chipsleeve Standard ARM

Compression Level

15-25mmHg*

Features

Chipsleeve garments are made for the upper and lower extremity. Filled with chipped foam and designed with directional channels, each garment works to efficiently direct lymph fluid and promote drainage. Patients with fibrotic limbs will enjoy the cocoon-like fit and massaging effect of the chip filled garment.

The Chipsleeve Standard Arm provides mild to moderate gradient compression from the hand to the axilla. The product includes an Oversleeve, a high-stretch cover that improves the product fit, increasing the level of compression. Use the garment as a liner for bandaging or as an independent compression solution.

Oversleeve Colors

Black

Navy

Pink

Leopard

Tie Dye

Blue Horizon

Ideal for

- Lymphedema (Stage I-II)
- Fibrotic tissue

Includes

- Chipsleeve Arm
- Oversleeve (Black)
