

Product Announcement – Total Knee 2000

There has been a new improvement and slight design change to the Total Knee 2000. The Total Knee 2000 has undergone design improvements to housing, making it bigger, stronger and more durable. To accommodate this change to the housing, the knee caps also underwent an internal change to fit the knee. This means the older knee caps will not fit on the new Total Knee 2000 or Total Knee 2100, and the new knee caps will not fit on the older Total Knee 2000 and Total Knee 2100. New part numbers have been created to accommodate this soft rollover. The difference of the old and new version of the knee will come down to the serial number. Any Total Knee 2000 with a serial number of MXC103615 and lower is the older version. With this change also comes a color change to the bumper, which will now be black instead of grey.

Below you can find the new part numbers for the new kneecaps and images of the knees with black bumper covers. Please note these will also be available for the Total Knee 2100, as this product has already gone through this change.

NEW Knee Cap Item Numbers		
Item Number	Item Description	Image
2052N	Knee Cap, Small, Black New	
2053N	Knee Cap, Large, Beige New	

Key Takeaways

- The new kneecaps **will not fit** on the older versions of the Total Knee 2000 (Serial Number MXC103615 and below)
- Bumper cover is now black instead of grey
