

ICEFORM® Cushion Liner, Locking Liner and Sleeve

The Iceform products are made of Thermoplastic Elastomer (TPE) material and covered with a seamless durable textile. The unique thermoformability of the TPE material allows the liner to adapt to residual limb irregularities and shape, providing optimal comfort for low to medium impact use.

The material properties of the sleeve capture an individual's unique limb shape for optimal comfort and suspension. The elasticity of the TPE material and the featured Wave design allows for easy knee bending.

ICEFORM® LINERS AND SLEEVE
