

K2 SENSATION® WITH D/P FLEXION

Our most popular low activity foot, K2 Sensation is a comfortable walking prosthesis that provides smooth progression from heel strike to toe-off. And now, with D/P Flexion, K2 Sensation offers up to 9° of dorsi and plantarflexion to help reduce the risk of trips and falls, plus improve stability on ramps or when transitioning from sitting to standing. Independent adjustments for dorsi and plantarflexion let you optimize flexion resistance for each user for maximum stability. Add our zero-build-height Unity® pump module to create the only sleeveless elevated vacuum solution for less active users. Both D/P Flexion and Unity are retrofittable to existing K2 Sensation feet.

FEATURES

FULL LENGTH TOE LEVER

The full-length keel/toe lever matches the length of the sound foot, producing a smoother and more symmetrical gait, while maximizing energy return.

MULTI-AXIAL GROUND COMPLIANCE

Multi-axial compliance of the foot provides improved ground contact during ambulation on uneven surfaces.

SANDAL TOE

Narrow, anatomically-correct foot cover with a provision for the use of a sandal-toed shoe.

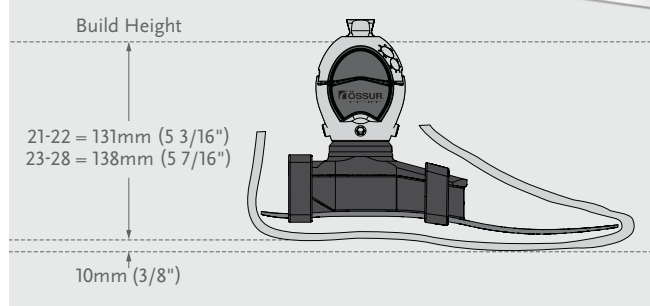

HYDRAULIC FLEXION

Hydraulic dorsiflexion and plantarflexion provides the user with toe clearance in swing phase, helping decrease the risk of trips and falls.
