RECOMMENDED MATERIALS, FABRICATION & SUPPORT PRODUCTS

NEW!

ULTRA-LITE™

CARBON & GLASS MATERIALS

Fabtech Ultra-lite fiberglass tapes are specifically designed for use when additional reinforcement layers are needed in prosthetic and orthotic device designs and the shear strength of fiberglass is required.

NEW!

TOUGHENED PVA BAGS™

DESIGNED FOR O&P

Our PVA bags are incredibly consistent, have a far greater breaking tolerance and stretch more than any other PVA bag on the market..

+PLUSeries™

CARTRIDGE ADHESIVE SYSTEM

PLUSeries® Cartridge Adhesive System is the fastest curing 2-component structural urethane adhesive on the market.

AVAILABLE IN 25 SECOND, 60 SECOND, 90 SECOND
WORKING TIMES | 50ML AND 220ML SIZES

RESTECH+™

ADVANCED EPOXY RESIN

Fabtech Restech+ Advanced Epoxy Resin is formulated with Advanced Polymers, designed to take repetitive abuse demanded from laminated composite orthotics and prosthetics.

RAPID CURE HEAT BAG™

RAPID CURE HEAT BAG SYSTEM

The Fabtech Rapid Cure Heat Bag is a inexpensive mobile oven that gets pulled over your prosthetic and orthotic epoxy laminated devices to speed up the curing process. Easily reducing the cure time in half.

Available from your local distributor
