

# The Tele-Range Elbow

## Post-Op Brace

**Smart stabilization for better healing. Reduce motion, support recovery, and stay comfortable.**

Top Shelf Orthopedics introduces an innovative brace that utilizes updated technology for ease of fit and patient comfort — helping prevent excessive motion and control elbow joint movement following injury or surgery.

# The Tele-Range Elbow

## Post-Op Brace

Innovative post-op elbow support with controlled flexion, extension, and customizable fit — all in a low-profile design.

### Indications:

- Post-operative immobilization of the elbow joint
- ROM control for the elbow following injury or surgery
- Conservative treatment of elbow dislocation or subluxation
- Stable or internally fixed fractures of the distal humerus or proximal radius or ulna
- Biceps tendon repair

### Features and Benefits:

- Comfortable but easy to remove hand piece
- Sturdy yet lightweight, low-profile design for patient comfort and compliance
- Flexion and extension control in 10-degree increments
- Multiple lockout positions
- Four telescoping segments to allow for optimum length and strap placement away from incision sites
