

Versatile Wrist Hand

DCT-1516 The Trend Versatile Wrist and Hand Brace is a game-changer in the recovery of specific wrist and hand fractures, including boxer's fractures. Designed with versatility in mind, this brace treats a variety of conditions with a patent-pending design that sets it apart from traditional solutions. What makes it truly unique is the built-in range-of-motion dial, locked at the top of the brace. This innovation allows precise adjustment of finger flexion and extension to match the exact degree needed for optimal healing-customized to each patient's injury.

Indications

Fractures or injuries to

- MCP Joints
- Phalanges
- PIP Joints
- Metacarpals

Patents Pending

PDAC Approved: L3915/L3916
