

TRI-PLANAR Orthosis

The coronal plane adjustment, featured in both the EV and Dual Action as well as the 655SKG Tri-Planar Articulated AFO, adjusts for varus/valgus of the foot/ankle complex. The orthosis is secured and fully adjustable to accommodate all parameters.

The sagittal plane adjustment featured on the APU, Dual Action and Tri-Planar Articulated AFO's adjust for the plantar flexion/dorsiflexion of the foot/ankle complex.

The transverse plane adjustment, new to the Articulated AFO line, adjusts for internal/external rotation of the foot/ankle complex.

The Tri-Planar Articulated AFO combines the sagittal and coronal plane adjustment features of the Dual Action Orthosis with the transverse plane adjustment previously never offered with a PRAFO® Orthosis.
