

NEW WATERPROOF ENDO COMPONENTS

College Park's endo components are designed for durability and performance. This line of endo components uses a high grade of titanium, stainless steel, and aluminum for superior outcomes and peace of mind in different environments. Whether you need waterproof options or specialized solutions for pediatric care, our diverse product line ensures the right fit for every need.

Designed and tested for corrosion resistance, these waterproof components have been approved for submersion in the ocean and chlorinated pools.
