

BALANCE FOOT™ J + UNITY™ SLEEVELESS VACUUM

Balance Foot J is a lightweight, energy-storing foot designed to meet the needs of slower speed walkers. It features a polyurethane heel for stability and cushioning at heel strike and a full-length keel for energy storage and return. Patients experience a smoother rollover with more mid-stance stability, even in hard-soled shoes.

And now Balance Foot J users can go sleeveless, with our Unity Sleeveless Vacuum System, for moisture evacuation and volume control.

IMPACT LEVELS

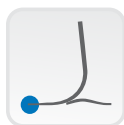

FEATURES

ACTIVE TIBIAL PROGRESSION

Vertical forces generated at heel contact are initially absorbed and translated into forward motion described as Active Tibial Progression.

FULL LENGTH TOE LEVER

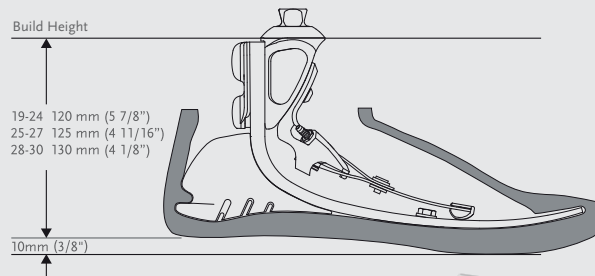

The full-length keel/toe lever matches the length of the sound foot, producing a smoother and more symmetrical gait, while maximizing energy return.

PROPORTIONAL RESPONSE

The layering of carbon fiber optimizes the deflection of the forefoot from mid-stance to toe-off proportionally to the user's weight and impact level.

UNITY FOR BALANCE™ FOOT J

SUGGESTED BILLING CODE*
L-5976, L-5781

RATINGS

- Low to moderate impact levels
- Patient Weight: 99-300 lbs (45-136 kg)
