

WRIST, FOREARM & FINGERS

The demands on our engineers and designers were both simple and lofty: build a support which exceeds all expectations.

A support that is both “high tech” and “high touch”. Something unmistakably easy to wear with a character distinctly different from all others.

We re-examined the wrist and the healing support it needs under all circumstances. Searched for, invented, and stress tested the latest materials and applied them to the latest medical research, we developed an entirely new line of wrist functionality.

While our newly created wrist supports feature authentic, genuine materials and fascinating unique designs, they characterize not only your basic needs of wrist supports, but also the range of options you may not have expected.

Sidewinder™ Wrist Supports:

Our “Truly Universal” wrist and forearm support is designed to accommodate the widest to the smallest of forearm sizes while still providing an excellent custom fit. Patent Pending Radial and Ulnar Closure Systems with our Ulnar Lacing Closure™ and EZY-Custom™ Closure Tabs provide the fit you’ve always wanted in a Universal wrist.

Indications: Recommended for carpal tunnel syndrome; sprains; soft tissue injuries; distal, radial, and ulnar fractures; soft tissue wrist injuries and scaphoid fractures.

Materials:

- Breathable, Moisture Wicking, and Comfortable Orthopaedic Felt

Fit & Function:

- Can be applied with one hand
- Universal - superior custom fit from the smallest to the largest of hands, wrists, and forearms
- Patent Pending Radial and Ulnar Closure Systems
- Incorporates our EZY-Custom™ Closure Tabs which allow equal tension regardless of forearm size
- Ulnar Lacing Closure™ allows for custom Dorsal Stay alignment
- Removable Palmar Spoon and Dorsal Stay for functional management of the injury
- Double Dorsal Stay pockets provide proper dorsal stay position
- Highly contoured design for optimum fit
- Accommodates patented FirstICE® cold therapy system

Options:

- MPFlex™ version offered for maximum metacarpal phalangeal joint flexibility of the thumb
- Available in 8” and 10.5” lengths

Ultimate™ Wrist Supports:

Our most popular and economical wrist and forearm support is loaded with features. Newly redesigned to provide even more comfort, features, and options, the Ultimate now is available in our original Breathable Hyper Foam and our new breathable moisture wicking Orthopaedic Felt. New highly contoured design for optimum fit and excellent MP function. Our redesigned brace will also accommodate a wider range of sizing,

Indications: Recommended for carpal tunnel syndrome; sprains; soft tissue injuries; De Quervain's Tendonitis; distal, radial, and ulnar fractures; gamekeeper's thumb; carpometacarpal injury; soft tissue wrist injuries and scaphoid fractures.

All of our Ultimate™ Wrist Supports feature the following:

Fit & Function:

- Can be applied with one hand
- Highly contoured design for optimum fit and excellent MP function
- Removable Palmar Spoon for functional management of the injury
- Dorsal and Radial Stay for maximum support
- Dorsal Closure

Options:

- Available in Abducted Thumb

Suggested HCPCS Codes:

- L3807 Wrist hand finger orthosis, without joint(s), prefabricated, includes fitting and adjustments, any type.
- L3908 Wrist hand orthosis, wrist extension control cock-up, non-molded, prefabricated, includes fitting and adjustment.

WSO™ Wrist Stabilization Orthosis:

The WSO™ was developed in cooperation with Athletic Trainers who were interested in minimizing unwanted wrist dorsiflexion (extension) injuries for football lineman. The brace, designed to replace taping, is also appropriate for other sports injuries and prophylactic protection.

The WSO™ is made of durable nylon and comfortable neoprene components, each chosen to withstand the rigors of any demanding activity, while also allowing aquatic use.

Materials:

- Orthopaedic Neoprene

Fit & Function:

- Durable, comfortable, waterproof
- Stackable plastic inserts provide variable dorsiflexion (extension) resistance.
- Opposable Velcro® strapping minimizes brace rotation, facilitates brace application
- Fits left and right

Suggested HCPCS Code:

- L3908 Wrist hand orthosis, wrist extension control cock-up, non molded, prefabricated, includes fitting and adjustment

Medium	6 to 7"	15.3 to 17.8 cm	
Large	7 to 8"	17.8 to 20.3 cm	
Extra Large	8 to 9"	20.3 to 22.9 cm	

The Boxer™:

Allows the caregiver an option to casting. Meticulous attention to every aspect of the Boxer™ is apparent. The Palmar Spoon, Ulnar/Dorsal, and Metacarpal Stays are designed to eliminate pressure on the ulnar styloid and hold the wrist and fingers in the preferred angle of support when treating 4th and 5th metacarpal fractures.

Materials:

- Orthopaedic Neoprene

Fit & Function:

- Comfortable
- Alternative to casting or splinting
- Can be applied with one hand
- Allows adjustment for swelling and removal for skin care
- Velcro® Hoop Closure will not snag clothing
- Removable Palmar Spoon, Ulnar/Dorsal, and Metacarpal Stays
- Ulnar/Dorsal Stay is pre-adjusted with fingers in 70° flexion
- Palmar Stay is pre-adjusted with wrist in 30° extension
- Metacarpal Stay is easily adjustable
- Engineered Dorsal Stay eliminates ulnar styloid pressure
- Semi-Universal

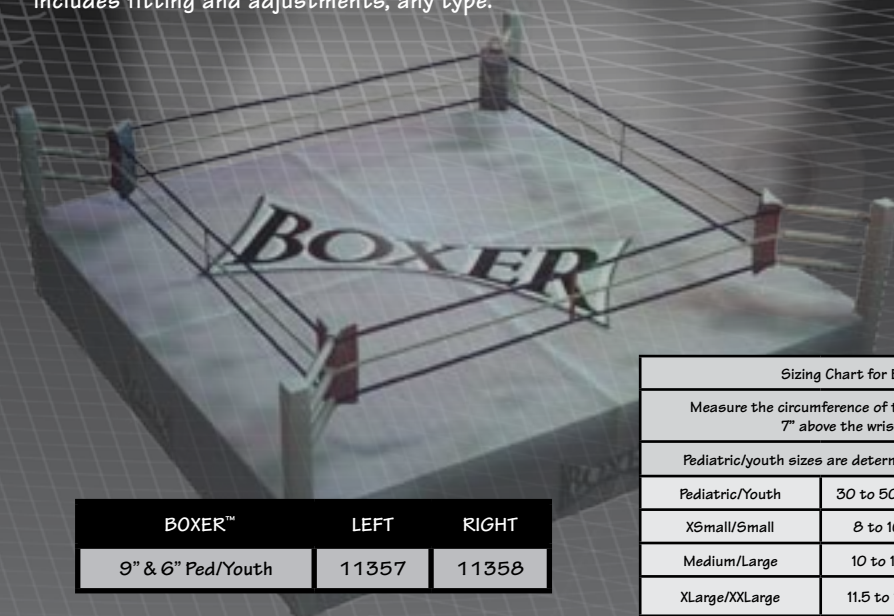

Options:

- Available in 9" and 6" Pediatric/Youth

Suggested HCPCS Codes:

- L3917 Hand orthosis, metacarpal fracture orthosis, prefabricated, includes fitting and adjustment.
- L3807 Wrist hand finger orthosis, without joint(s), prefabricated, includes fitting and adjustments, any type.

PLATFORM™

Platform™ Wrist Splint:

The best platform for comfort, support and fit. The clamshell effect of this design creates a universal product allowing significant customizing and adjustment for edema, while providing excellent positioning of the wrist, hand and fingers. The outstanding support provided by the Platform™ is further enhanced by two adjustable dorsal and palmar stays precisely shaped to allow functional positioning of the wrist and fingers

Indications: Provides proper support to the wrist while allowing the fingers to rest comfortably on the extended padded platform. Recommended for contractures of the hand and wrist following stroke, arthritis and trauma, carpal tunnel syndrome, and sprains.

Materials:

- Breathable, Moisture Wicking, and Comfortable Orthopaedic Felt with Durable Perforated Vinyl

Fit & Function:

- Extended Resting Hand Platform Splint in a functional position with metacarpal phalanges in 15 to 20 degrees of flexion
- Velcro® Hoop Closure will not snag your clothes
- Maximum Support with two adjustable Dorsal and Palmar Stays precisely shaped to allow functional positioning of the wrist, hand, and fingers
- Removable Palmar Spoon and Dorsal Stay for functional management of the injury
- Accommodates patented FirstICE® cold therapy system
- Fits left and right
- Universal
