

# Townsend EZG8

## Rehabilitative Walking Boots

Townsend Design is continuously investigating ways to better serve our customers and their patients. In August, Townsend will launch an updated version of our standard TD Walker with a new integrated version called the EZG8 (Easy Gait) Walker. The new walker will incorporate some of the same features included on the TD Walker but with a more uniformed appearance similar to our lines of walkers in our portfolio, including the XLR8 and the Pedi Walker.

The transition will enable Townsend to offer a more streamlined product lineup to our customers without compromising quality and supply chain demands. We are confident the change will be beneficial to you and your patients as some of the features are proven to provide greater benefits.

### Features

- Bendable Metal Uprights
- Pneumatic and Non-Pneumatic Versions
- Wider Foot Shell and Rocker Bottom
- Padded Toe Cover Flap
- Integrated Outer Sole with Aggressive Tread Pattern

### Benefits

- Reduces Edema and Pain
- Rocker Bottom Stabilizes The Ankle and Improves Gait
- Malleable Uprights Provide The Most Customized and Intimate Fit
- Wider Foot Shell Accommodates Swollen Foot From Injury
- Aggressive Tread Improves Grip and Stability on Slippery or Unstable Surfaces
- Toe Cover Offers Warmth and Protection
