## Instructions

- 1** Purge the cartridge. Snap off the tip with screw driver. Insert cartridge into dispenser gun. Expel a small amount of adhesive to purge the cartridge.

- 2** Install mix tip. Line up mix tip appropriately and screw into place. Tips can only be used once.

- 3** Run a test bead approx. 1" in length. Store unused portion by leaving the mix tip on when done.

- 4** Leave used tip attached as a cap until next use to keep glue from drying out in the tubes. When your ready to use the glue again remove old tip and replace with a new tip.

## CAUTION

1. Read carefully BEFORE applying adhesive to ensure proper adhesion.
2. Quik Glue sets very fast. To ensure a proper bond, work quickly. Refrigerate the cartridge to slow down work time.

## Parts Sold Separately

**CDDM220** | Dispenser is required for use (sold separately)

**CD412** | 12-Pack Extra Mix Tips for 220 cc Cartridge.
