

A-PLUS™ PROSTHETIC SOCK

THE ACRYLIC PLUS LYCRA SPANDEX PROSTHETIC SOCK

A-PLUS STANDARD SOCK SIZES

- Softness plus stretch
- Wicking plus conformability
- Easy-care plus long-wear

Because the acrylic/Lycra spandex yarn snugs the knit close together, a 2-ply (green stitching) approximates the thickness of a 3-ply wool sock; 3-ply (blue stitching) approximates 5-ply wool and the 4-ply (red stitching) approximates 6-ply wool.

All A-Plus socks will measure 10% less in width so that the size of the A-Plus sock is the same size that patient would wear in a wool sock. The length measurement is stretched in fleecing and will relax to stated measurement when washed. The stretch allows the A-Plus sock to fit a fairly wide circumference range; however, special sizes can be ordered if needed.
