

PKA™ Articulating Ankle Foot Orthosis

*Positioning and Walking Ankle Foot Brace
for Custom KAFO or AFO Adaption*

Features-

- » Adjustability in all planes of motion, depending on design chosen
- » Clinically proven for effective ambulation*
- » Compatible with all liner variations that we offer if applicable (sold separately)
- » Proven superior integrity of the superstructure**
- » Eliminate posterior heel contact
- » Control dorsi-plantar flexion
- » Controls external or internal rotation of the hip when supine
- » Accommodates those at risk of skin breakdown

** Heel strap positioned inside the heel connecting bar for display purposes only

-Available in Adult and Pediatric

The PKA™ Orthosis should only be used in conjunction with custom made or pre-fabricated Knee Orthoses or Knee Ankle Foot Orthoses. The PKA™ Orthosis should not be used as a standalone Ankle Foot Orthosis.

Uses-

- » For those patients who wear their KAFO 24 hours a day, or spend the majority of their time at rest or in bed.
