- Radiolucent for O.R. and Imaging environments
- Versatile—available in multiple widths and lengths
- Single-patient-use for infection control

Universal Table Straps

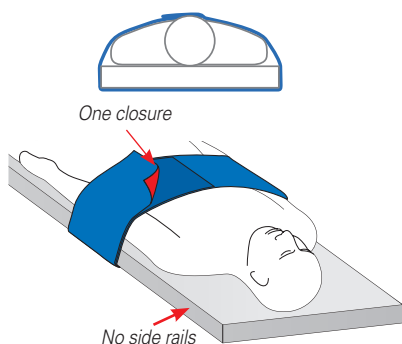

Extraordinarily strong and highly versatile for safely securing just about any patient during any procedure. The red hook adheres to either side of the soft blue loop to accommodate any application. Use the **one-closure** strap for tables without side rails—easily shorten by overlapping or trimming the blue loop. The **two-closure** model is ideal for tables with rails, eliminating the need to wrap the strap under the table—simply cinch up the ends for smaller patients. Use the **three-closure** model for procedures requiring quick and easy patient access.

To order, see p. 2.

Pre-configured to match your table and save you time!

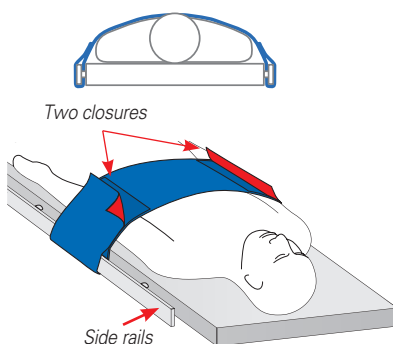

A. Simplest

One-piece • One closure
Encircles patient and table

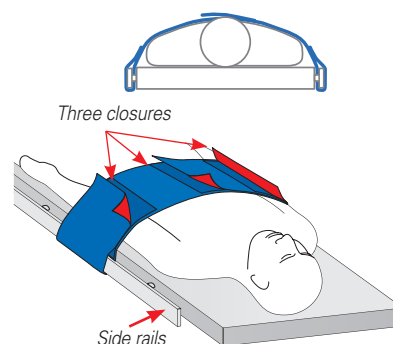

B. Strongest

One-piece • Two closures
Loops through side rails

C. Easy Rapid Patient Access

Two-piece • Three closures
Loops through side rails
