

## Low build height for a great freedom.

The ideal solution for active users with long residual limbs. It provides secure contact with the ground, as well as responsive action and ground compliance.

**Suggested for** medium and high mobility users with long residual limbs who want a responsive, all-around foot.

Responsive with low height

## KEY FEATURES

Split-toe

Range of motion  
20°

Increased  
Shock Absorption

## KEY BENEFITS

- Physiological and energy efficient gait
- Smooth rollover during the whole gait cycle
- High dynamic response to support an active lifestyle
- Possibility to do a wide range of activities with just one single foot
- Ground compliance and stability on all terrains
- Reduction of secondary issues thanks to a more balanced posture and symmetrical gait
- Low maintenance
- Lightweight

# TECHNICAL INFORMATION
