BONDTEK

SETS FAST, HOLDS SHAPE, NO SAG!

New! Bondtek All Purpose Urethane Adhesives

Introducing Bondtek Urethane Adhesives:

Great for any situation when you need something glued quickly & easily. Bondtek is the cost-effective go-to adhesive for all your fab needs. Sets fast, holds shape, no sag.

Made with VWT (Variable Work Time) formula:

Our industry leading PLUSeries adhesives are 100% percent temperature stable, this means they gel and cure at the same rate no matter what the temperature. We have developed Bondtek to have the best of both worlds. Cooler a bit slower, warmer a bit faster, 70 degrees and it is just right!

Store it in a warm place and speed it up, store it in a cool place and slow it down. It's up to you, how you want Bondtek to cure.

Environmental Health:

We eliminated the Proposition 65 chemicals! The net result is a product that is safer to use, and has less demanding regulatory requirements! This is a good thing!

Easy Selection:

Bondtek is sold in standard 50ml & 220ml sizes so your current PLUSeries dispensing guns and tips can be used. Black and white color choices.

Features

- Ships non-hazardous
- No odor
- Strong as PLUSeries after full cure
- Prop 65 Free
- Black and White colors
