## **Araion™ Stockinette**

By Comfort Products

**Araion™ Stockinette** from Comfort Products combines Kevlar and Nylon to create a unique tubular stockinette with exceptional properties. The qualities of each of these materials allows for a stockinette that provides superior impact and fatigue resistance.

**Araion** Stockinette is 40% stronger than fiberglass while weighing almost half as much. It also has a strength-to-weight ratio approximately two and one half times superior to fiberglass, and it eliminates itching!

**Araion™ Stockinette** has excellent thermal stability with minimal changes in dimension through normal temperature changes. It is compatible with Polyester, Acrylic, Vinylester, Urethane, and Epoxy resins.

**Araion™ Stockinette** requires no changes in normal fabrication methods and stretches like traditional stockinette.

Features of **Araion™ Stockinette** include:

- Superior impact and fatigue resistance
- Requires no change in traditional fabrication methods
- Stronger and lighter than fiberglass
- Does not itch
