

The California® Ventura™ Spinal Brace is easy-to-fit and simple for the patient to don and doff. The orthosis provides controlled levels of stability by featuring easily removable rigid plastic components—making it ideal throughout rehabilitation.

Indications

- Post-operative laproscopic disk replacement
- Post-operative IDET procedures (Intradiscal Electrothermal Annuloplasty)
- Post-operative lumbar laminectomy
- Post-operative spinal fusion
- Chronic low back pain
- Mechanical back pain with activities of daily living
- When spinal control of extension and flexion is desired/required

L0626, L0627, L0631, L0637 approved

Order and stock individual components using model numbers above.

❶ Compression belts come in sizes

❷ Anterior panel is one-size-fits-all

❸ Pick a posterior panel

❹ Have confidence when billing individual components. Refer to the chart and bill for a Complete Orthosis model number. If you fit all components used in a Complete Orthosis, you may use the orthosis's model number.
