

COMPATIBILITIES & CAPABILITIES

We work closely with all manufacturers to ensure you and your client can select the elbow, wrist unit and terminal devices that are best suited to his/her ADL's and that they work together as intended. You can also find a responsive digital version of our compatibility chart on our website at coaptengineering.com/compatibility-tool. There, you can download and share your results directly.

1. Pattern recognition command of elbow lock/unlock is possible.
2. Requires "Coapt Modification" from manufacturer.
3. Required for pattern recognition grasp selection command of TASKA, Ability Hand, and some beBionic multifunction hands.
4. Pattern recognition grasp selection only possible with WDD versions of older (Steeper-style) beBionic hands.
5. Applicable to Quantum hands with s/n M9618 or newer.
