

GLOBAL KNEE AC

Patent Pending

Fitting a brace on a
conical shaped leg has
been a clinician's nightmare...
Not anymore!

*Designed specifically to
provide support and pain relief
for global knee osteoarthritis
and for patients with knee OA
who are symptomatic for
anterior knee pain.*

*NEW Adjustable Anterior Closure on
calf for hard to fit patients with OA*

Patella Sling
*The "Sling" allows for
directional control of the patella.*

**BRACING
INNOVATIONS**

**Provides stability, reduces pain
and swelling, improves lives**

The patella sling and "U" buttress lifts and controls the patella with an inferior to superior directional pull. This pull places the patella in a more natural position and helps patients propel up and down stairs with more stability and less pain.

Anterior closure adjusts to various calf sizes.

Fits Real Patients!
