COMPRESSOGRIP® B/K ELASTIC SHRINKER

The original tubular compression prosthetic shrinker used for control or prevention of edema following amputation surgery, for limb volumetric maintenance, to minimize hypertrophic scarring and to give compressive support for pain relief. Compressogrip Shrinkers assure controlled compression, ease of application and wearer acceptance. Efficacy clinically tested (reprints available).

Compressogrip B/K Shrinker with X-STATIC® – The Silver Fiber® has all the benefits of Knit-Rite's original Compressogrip Shrinker. In addition, the X-STATIC adds permanent antimicrobial benefits to inhibit odor in the garment and effectively wicks moisture away from the skin. All Compressogrip is made from latex-free materials and washable. When determining size, allow for swelling.

White, Beige — 92% polyester, 8% spandex

Polyester/X-STATIC® Grey — 87.4% polyester, 4.6% X-STATIC, 8% spandex

For custom logo shrinkers, see pg.55, or ask customer service or your distributor for program details.

Fits Circumference = Measurement of B/K Circumference 2" Below Medial Tibia Tubercle
Measurement of A/K Circumference 2" From Distal End

NOTE: Compressogrip shrinker fabric gives up to 20-25 mmHg compression at 50% stretch. At 100% stretch the compression is almost doubled. Double layers will almost double compression at both 50% and 100% stretch. Application of more than two layers may exceed the limits of desired therapeutic pressure.

Fitting Instructions:

1. Apply the first layer.

2. Position the ring snugly.

3. Apply the second layer to a point of desired maximum compression.

Now available with facility logo! See pg. 55!

TAPERED COMPRESSOGRIP® B/K ELASTIC SHRINKER

Tapered Compressogrip B/K Shrinkers provide additional width at the top to accommodate fuller thighs and reduce rolling and bunching behind the knee caused by too much compression above the knee. Tubular compression material is used for control or prevention of edema following amputation surgery, for limb volumetric maintenance, to minimize hypertrophic scarring and to give compressive support for pain relief. Compressogrip Shrinkers assure controlled compression, ease of application and wearer acceptance. Compressogrip is made from latex-free materials and washable. When determining size, allow for swelling.

White, Beige — 92% polyester, 8% spandex

Polyester/X-STATIC® Grey — 87.4% polyester, 4.6% X-STATIC, 8% spandex

Patent Pending.

For custom logo shrinkers, see pg.55, or ask customer service or your distributor for program details.
