

You control your fit and comfort.

Imagine not wondering where you can change your socks. (Or if you brought them.)

Imagine not adjusting your life to your device.

With RevoFit, you control your fit and comfort.

Adjust anytime, anywhere. **Just turn the dial.**

How it works

Your practitioner builds RevoFit into your device. When you need to adjust, turn the dial, even through your clothes. RevoFit is the only system with built-in micro-fit adjustability for upper and lower limbs.

Take control of your socket

RevoFit gives you the freedom to control your device. Leave discomfort, disrobing, multiple refittings, and sock changes behind.

Go and do what you love to do!

"I don't have to adjust my life to my socket anymore because my RevoFit socket adjusts to my life. It has changed my life"

- Aaron Murray, RevoFit user

Talk to your practitioner about how **RevoFit[®]** can help you focus more on your life and less on your socket.
