

Designed by a leading American podiatrist, the GentleStep™ shoe provides the ultimate in comfort and protection. Constructed with the latest in bio-compatible materials, it is lightweight, machine-washable and vented for breathability. The toe area of the sole is smooth to prevent tripping on carpets for patients with a shuffling gait. Toe upper is made of soft, elastic material which accommodates deformities and reduces pressure from edema. Firm, extended heel counter for rear foot stability. Single, hook and loop strap fastener for easy closure. Mild rocker sole permits easier ambulation. Available in black.
