### Rules & ordering

An additional paid option is tattoo placement. You can choose a tattoo ready from our website or design your own.

In the case of your own tattoo, please send us a graphic file. However, there are some rules:

- The photo or drawing must be on a white background.
- Vertical layout - it means that the height of the drawing should be at least twice its width.
- Appropriate resolution must guarantee that no grain is formed - usually files over 300 kB are appropriate.
