

Colorful News from TheraTogs

25 April 2025

TheraTogs announces some significant and immediate changes to the TheraTogs product line, **which will apply beginning with any orders placed after April 25th:**

- **The much-beloved "old" material is back** - featuring a softer foam layer with more grip, and a time-tested UBL (loop) surface that engages well with our current hook tabs (1300 cycles and counting).
- **The familiar gold fabric will be out of stock until July**, as we transition to the new supply source.
- **We're seizing this opportunity to celebrate** the spring and summer months (in the Northern Hemisphere, anyway) with a bouquet of color choices for your next TheraTogs orders.

We've been planning this transition for several months, but the abrupt, unannounced closure of our fabric mill deprived us of the opportunity to offer any advanced notice. We are excited to bring you these snazzy new colors, though - get them while supplies last!

Effective April 24th, all TheraTogs systems will be available in multiple colors (cute baby not included):

Black (BK)

Pink¹ (PK)

Light Blue¹ (LB)

Royal Blue (RB)

Teal (TL)

No SKU numbers have changed. You simply have to indicate your color choice when placing your order – via your local orthotist, one of our catalog partners, or your online Professional Account.

All components contained in any SKU will be made of a single color of fabric. Special requests for mixed-color SKUs will be considered as needed.

Questions? Contact Customer Service at customerservice@theratogs.com | 970-239-0344.

¹ Pink and Light Blue systems are available in the current foamed fabric composite material.
