

# Life Changing Innovation

## **Aspen** Vista® MultiPost Collar

CODE L0180 APPROVED

The Aspen Vista MultiPost Collar provides an additional level of motion restriction and adjustability compared to conventional cervical collars<sup>1</sup>. The Aspen Vista MultiPost back panel includes three height settings to accommodate differences in patient anatomies. The pivoting occipital panels help provide extra support to the occipital region. Like the Aspen Vista Collar, the Aspen Vista Multipost Collar is one size adjustable to minimize sizing errors and reduce waste. The Aspen Vista collar incorporates Aspen's cotton lined, open-cell foam padding system, proven to enhance skin care<sup>2</sup>.

#### Fully Adjustable for the Perfect Fit

Height adjustment technology in both the front and back allows clinicians to effectively fit individual anatomies and multiple conditions.

## Achieve a Controlled Environment for Healing

The Aspen line of Acute Restriction collars is designed to achieve a controlled environment for patients healing from trauma or surgery. These collars provide optimum cervical motion restriction<sup>3</sup>, minimize incidences of skin breakdown<sup>4</sup> and increase patient compliance.

#### Pivoting Occipital Panels Reduce Pressure

Padded panels pivot bilaterally and self-adjust to cradle most head shapes for increased support and to help maximize patient comfort. Reduced patient contact on occipital midline helps limit pressure points and heat buildup in areas prone to skin break down.

### Increased Visibility for Improved Care

Innovative design provides greater visibility, enhancing the ability to inspect the skin without removing the collar.

# Easily Steps Up to Support Patients' Condition (A)

If additional motion restriction is required, both the Aspen Vista CTO and Aspen Vista CTO4 Upgrade Kits attach easily to the Aspen Vista MultiPost Collar.

#### Promotes Effective Skin Care (A)

Cotton-lined Aspen pads wick moisture from patient's skin while clickable polyurethane foam helps ensure optimal pressure distribution.<sup>5</sup>

#### Vista Collar Front Panel

Features the Aspen Vista Collar front panel with the patented, easy height adjustment system for one size adjustability and an extra large tracheal aperture for improved access and airway management.
