

Model FFP

Becker Customizable Flat Footplate Kit for Triple Action® & MILINE™

Description

The Becker customizable Flat Footplate (FFP) Kit for Triple Action and MILINE is based on a high quality, prepreg carbon composite footplate developed for custom AFO and KAFO designs. The FFP Kit is compatible with the Becker Triple Action 16mm (Model 3B76) and all MILINE 16mm ankle components. The kit provides all the components necessary to produce a single upright (medial, or lateral), or double upright orthosis. For single upright orthotic designs, the low, or high offset stirrup may be installed into the medial, or lateral side of the footplate channel. The desired clearance to the medial and lateral side of the heel may be set during installation.
